

Integrating Biofeedback into the Management of the Dysfunctional Voider

Faculty:

Lane S. Palmer, MD, Program Chair
Chief of Pediatric Urology
Schneider Children's Hospital
North Shore-Long Island Jewish Health System
New York

Wendy Bower, Ph.D.
Assistant Professor, Department of Pediatric
Surgery and Pediatric Urology
Chinese University of Hong Kong
Hong Kong

Ms. Janet Chase
Board Member, ICCS
Department of Surgical Research
Murdoch Children's Research Institute
Royal Children's Hospital
Melbourne, Australia

This continuing nursing education activity was approved by the Society of Urologic Nurses and Associates (SUNA) for 4 contact hours based on a 60 minute contact hour. SUNA is accredited as an approver of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation (Approval No. 28-25).

Course Description and Educational Goal:

To provide healthcare professionals who treat children with urologic conditions with an overview of dysfunctional voiding and its management using biofeedback-pelvic floor retraining.

Objectives:

- Recognize that dysfunctional voiding is one of several lower urinary tract dysfunctions in children
- Recognize urodynamic patterns of detrusor-external sphincter dyscoordination
- Identify the principles of biofeedback-pelvic floor retraining
- Evaluate the current literature regarding the benefits and limitations of biofeedback-pelvic floor retraining
- Identify the specific hardware used for biofeedback-pelvic floor retraining
- Analyze software used for biofeedback-pelvic floor retraining
